M5 EXPRESSWAY WEST-WIDENING SYDNEY, 2014

CASE STUDY

The Expressway West-Widening Project increased the capacity of the M5 South West Motorway by 50 percent, resulting in estimated travel time savings between 20-25 percent for peak-periods - on one of Sydney's most important and busiest road corridors.

In delivering on this high-profile & sought-after contract, J1-ITS successfully designed, supplied, installed and commissioned LED infrastructure solutions with a contract value of approximately \$1.4M.

Our Variable Message Signs (VMS) enable rapid traffic updates and timely driver awareness messages to promote smoother traffic flow. Most of the signs supplied feature a cantilever design with a gangway for easy sign access and maintenance.

J1 helps you on **your way**.
